Description

The Bel VRBC-16A2Ax is part of the non-isolated dc/dc converter series. The modules use a SIP package. These converters are available in a range of output voltages from 0.75 V to 5.5 V over a wide range of input voltage ($V_{in} = 8.3 \text{ V} - 14 \text{ V}$). The Bel VRBC-16A2Ax has a sequencing feature that enables designers to implement various types of output voltage sequencing when powering. The efficiency is typically 92% at 3.3 V output and 12 V input at full load.

Part Selection

Output Voltage	Input Voltage	Max. Output Current	Max. Output Power	Typical Efficiency	Model Number Active Low	Model Number Active High
0.75 V - 5.5 V	8.3 V - 14 V	16 A	80 W	94%	VRBC-16A2AL	VRBC-16A2A0

- Notes:**
1. Change the last character to "C" to indicate 0.20" pin length and active low.
 2. Add "G" suffix at the end of the model number to indicate Tray Packaging.

1. VRBC-16A2Ax series of modules include a sequencing feature that enables users to implement various types of output voltage sequencing in their applications. This is accomplished via an additional sequencing pin. When not using the sequencing feature, either, tie the SEQ pin to V_{in} or leave it unconnected.
