

FEATURES AND SPECIFICATIONS

molex® ATP-201™ Air Tape Press

19047-0001

The ATP-201 (19047-0001) Air Tape Press is an economical, electrically controlled, air powered termination machine. It is designed to provide an effective method for low cost, high quality terminations of Molex tape carried products including 4 to 8 AWG insulated and non-insulated terminals and 2 to 8 AWG non-insulated BCL series lugs.

Features and Benefits

- Accepts multiple, inexpensive die sets, which provide production flexibility
- Die set and product changeovers are quick and easy, reducing production down time
- Compact design and light weight make this unit ideal for a production environment
- Double index feature allows products with double spacing to process through this unit with the proper die set
- Meets ISO standards

Electrical

Voltage: 120V AC, 60 Hz

Air Pressure

95-110PSI (At the press)
6.55 / 7.58 Bar

Air Volume

1 Press 1.5 scfm (.00071m³/s)

Mechanical

Dimensions (with 24" reel mounting)

Height—889.00mm (35.00")

Width—1009.60mm (39.75")

Dimensions (without reel mounting)

Height—491.50mm (19.35")

Width—355.60mm (14.00")

Depth—279.40mm (11.00")

Weight: Gross—220.4kg (100lbs.)

Unpacked—165.4kg (75 lbs.)

Tape Reel Sizes

355.60mm (14.00")

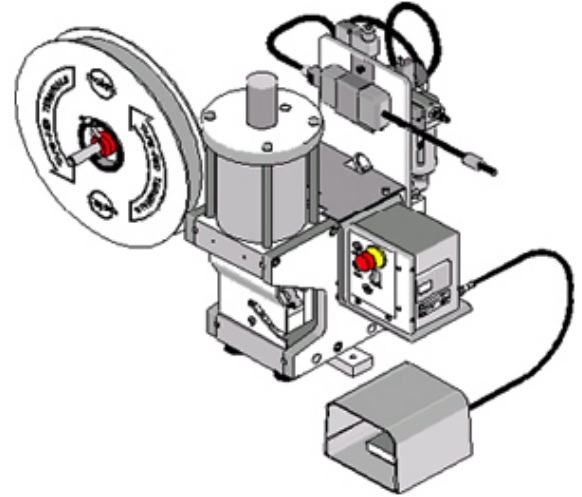

635.00mm (24.00")

Production Rate

Dependent on terminal product selection and operator skill

Single Index: 2800 per hour

Double Index: 2500 per hour

ORDERING INFORMATION

Order No.	Used With	Description
19047-0001	Tape carried product, 4 to 8 AWG insulated and non-insulated terminals and 2 to 8 AWG non-insulated BCL lugs	*ATP-201 Air Tape Press

*Press accepts multiple die sets (not ATP-301 die sets). Review Molex tape product part number on Molex web site to see the proper die set for ATP-201 that is linked. If unable to find the proper die set, please call 1-800-786-6539 and speak with a Molex Inside Sales representative
