

Quad smart power solid state relay for complete H-bridge configurations

Features

Type	$R_{DS(on)}$	I_{OUT}	V_{CC}
VN772K	120 m Ω ⁽¹⁾	9 A ⁽²⁾	36 V

1. Total resistance of one side in bridge configuration
2. Typical current limitation value

- Suited as low voltage bridge
- Linear current limitation
- Very low standby power dissipation
- Short circuit protected
- Status flag diagnostic (open drain)
- Integrated clamping circuits
- Undervoltage protection
- ESD protection

Description

The VN772K is a device formed by three monolithic chips housed in a standard SO-28 package: a double high side and two low side switches. Both the double high side and low side switches are made using STMicroelectronics VIPower™ M0-3 Technology.

This device is suitable to drive a DC motor in a bridge configuration as well as to be used as a quad switch for any low voltage application.

The dual high side switches have built-in thermal shutdown to protect the chips from over temperature and current limiter blocks to protect the device from short circuit. Status output is provided to indicate open load in off and on-state and over temperature.

The low side switches are two OMNIFET II types (fully auto protected Power MOSFET in VIPower™ technology). They have built-in thermal shutdown, linear current limitation and overvoltage clamping. Fault feedback for thermal intervention can be detected by monitoring the voltage at the input pin.

3 Application recommendations

Figure 44. Application diagram bridge drivers

Most motor bridge drivers use a reverse battery protection diode (D) inside the supply rail. This diode prevents a reverse current flow back to V_{BATT} in case the bridge becomes disabled via the logic inputs while motor inductance still carries energy. In order to prevent a hazardous overvoltage at circuit supply terminal (V_{CC}), a blocking capacitor (C) is needed to limit the voltage overshoot. As basic orientation, $50\mu F$ per 1A load current is recommended. As an alternative, a Zener protection (Z) is also suitable.

Even if a reverse polarity diode is not present, it is recommended to use a capacitor or Zener at V_{CC} because a similar problem appears in case the supply terminal of the module has intermittent electrical contact to the battery or gets disconnected while the motor is operating.

4.2.1 Thermal resistances definition

Values according to the PCB heatsink area.

$R_{thHS} = R_{thHS1} = R_{thHS2}$ = high side chip thermal resistance junction to ambient (HS₁ or HS₂ in on-state)

$R_{thLS} = R_{thLS3} = R_{thLS4}$ = low side chip thermal resistance junction to ambient

$R_{thHLSL} = R_{thHS1LS4} = R_{thHS2LS3}$ = mutual thermal resistance junction to ambient between high side and low side chips

$R_{thLSLS} = R_{thLS3LS4}$ = mutual thermal resistance junction to ambient between low side chips

4.2.2 Thermal calculation in transient mode^(b)

$$T_{jHS12} = Z_{thHS} \times P_{dHS12} + Z_{thHLSL} \times (P_{dLS3} + P_{dLS4}) + T_{amb}$$

$$T_{jLS3} = Z_{thHLSL} \times P_{dHS12} + Z_{thLS} \times P_{dLS3} + Z_{thLSLS} \times P_{dLS4} + T_{amb}$$

$$T_{jLS4} = Z_{thHLSL} \times P_{dHS12} + Z_{thLSLS} \times P_{dLS3} + Z_{thLS} \times P_{dLS4} + T_{amb}$$

4.2.3 Single pulse thermal impedance definition

Values according to the PCB heatsink area.

Z_{thHS} = high side chip thermal impedance junction to ambient

$Z_{thLS} = Z_{thLS3} = Z_{thLS4}$ = low side chip thermal impedance junction to ambient

$Z_{thHLSL} = Z_{thHS12LS3} = Z_{thHS12LS4}$ = mutual thermal impedance junction to ambient between high side and low side chips

$Z_{thLSLS} = Z_{thLS3LS4}$ = mutual thermal impedance junction to ambient between low side chips

4.2.4 Pulse calculation formula

$$Z_{TH\delta} = R_{TH} \cdot \delta + Z_{THtp}(1 - \delta)$$

where $\delta = t_p/T$

b. Calculation is valid in any dynamic operating condition. Pd values set by user.

6 Revision history

Table 22. Document revision history

Date	Revision	Changes
01-Sep-2004	1	Initial release.
31-Aug-2006	2	Document formatted into new ST template Dimensions updated, see Figure 55: Tape and reel dimensions (suffix "13TR") on page 31 Application diagram updated, see Figure 44: Application diagram bridge drivers on page 23
10-Jul-2009	3	Updated Table 3: Thermal data . Updated note of Figure 47: SO-28 PC board . Updated Figure 48: Chipset configuration .

Please Read Carefully:

Information in this document is provided solely in connection with ST products. STMicroelectronics NV and its subsidiaries ("ST") reserve the right to make changes, corrections, modifications or improvements, to this document, and the products and services described herein at any time, without notice.

All ST products are sold pursuant to ST's terms and conditions of sale.

Purchasers are solely responsible for the choice, selection and use of the ST products and services described herein, and ST assumes no liability whatsoever relating to the choice, selection or use of the ST products and services described herein.

No license, express or implied, by estoppel or otherwise, to any intellectual property rights is granted under this document. If any part of this document refers to any third party products or services it shall not be deemed a license grant by ST for the use of such third party products or services, or any intellectual property contained therein or considered as a warranty covering the use in any manner whatsoever of such third party products or services or any intellectual property contained therein.

UNLESS OTHERWISE SET FORTH IN ST'S TERMS AND CONDITIONS OF SALE ST DISCLAIMS ANY EXPRESS OR IMPLIED WARRANTY WITH RESPECT TO THE USE AND/OR SALE OF ST PRODUCTS INCLUDING WITHOUT LIMITATION IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE (AND THEIR EQUIVALENTS UNDER THE LAWS OF ANY JURISDICTION), OR INFRINGEMENT OF ANY PATENT, COPYRIGHT OR OTHER INTELLECTUAL PROPERTY RIGHT.

UNLESS EXPRESSLY APPROVED IN WRITING BY AN AUTHORIZED ST REPRESENTATIVE, ST PRODUCTS ARE NOT RECOMMENDED, AUTHORIZED OR WARRANTED FOR USE IN MILITARY, AIR CRAFT, SPACE, LIFE SAVING, OR LIFE SUSTAINING APPLICATIONS, NOR IN PRODUCTS OR SYSTEMS WHERE FAILURE OR MALFUNCTION MAY RESULT IN PERSONAL INJURY, DEATH, OR SEVERE PROPERTY OR ENVIRONMENTAL DAMAGE. ST PRODUCTS WHICH ARE NOT SPECIFIED AS "AUTOMOTIVE GRADE" MAY ONLY BE USED IN AUTOMOTIVE APPLICATIONS AT USER'S OWN RISK.

Resale of ST products with provisions different from the statements and/or technical features set forth in this document shall immediately void any warranty granted by ST for the ST product or service described herein and shall not create or extend in any manner whatsoever, any liability of ST.
