

## Single Output UWR Models

### Low-Cost, DIP-Packaged 3 Watt, DC/DC Converters

#### Features

- Low cost!
- Automated, SMT-on-pcb construction
- Industry-standard package and pinout
- 1.25" x 0.8" x 0.45" DIP form factor
- No external components required
- 5, 12 or 15 Volt outputs
- Choice of 3 ultra-wide input ranges:
  - 4.5-9 Volts
  - 9-18 Volts
  - 18-72 Volts
- Guaranteed efficiencies to 76%
- Fully Isolated, 1000Vdc guaranteed
- -25 to +75° C operation with no derating
- UL 1950, CSA 22.2 No. 234 and IEC 950
- EMI/EMC characterized
- Modifications and customs for OEM's

The 3 Watt, single-output, UWR Models of DATEL's XWR Series DC/DC converters deliver impressive levels of cost-effectiveness in an industry-standard package and pinout. These highly-efficient (as high as 76% guaranteed), fully isolated (1000Vdc minimum), DIP-packaged power converters provide true component-like convenience and flexibility to designers of modern distributed power systems.

Exploiting high-frequency (170-200kHz), flyback topologies and contemporary, highly automated, SMT assembly techniques, UWR Model DC/DC's have enough space to include input (pi type) and output filters within their package. Requiring no external components, these converters offer true "plug-and-play" convenience. They operate over the full -25 to +75° C temperature range with no output power derating.

Output voltages are either 5, 12 or 15 Volts. Input voltage ranges are either 4.5-9V ("D5" models), 9-18V ("D12" models) or an ultra-wide 18-72V ("D48" models). Transient response time is a quick 200µsec.

These extremely rugged modules are fully encapsulated with a thermally conductive potting compound. They are moisture and vibration resistant and have established a reputation for outstanding MTBF. For telecommunication, computer and other EMI-sensitive applications, these DIP-packaged DC/DC converters offer full EMI/EMC characterization data.

DATEL's UWR Model 3W DC/DC's are ideal replacements for other more costly, less reliable power converters as well as excellent choices for new design-ins in systems demanding small size, low cost and high reliability.

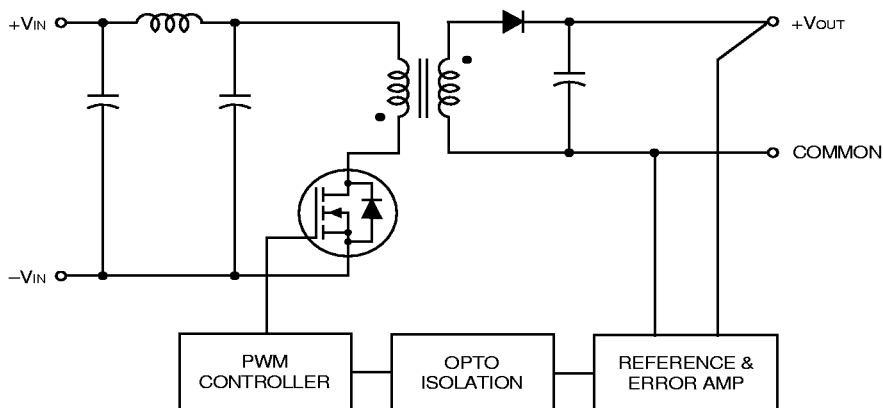

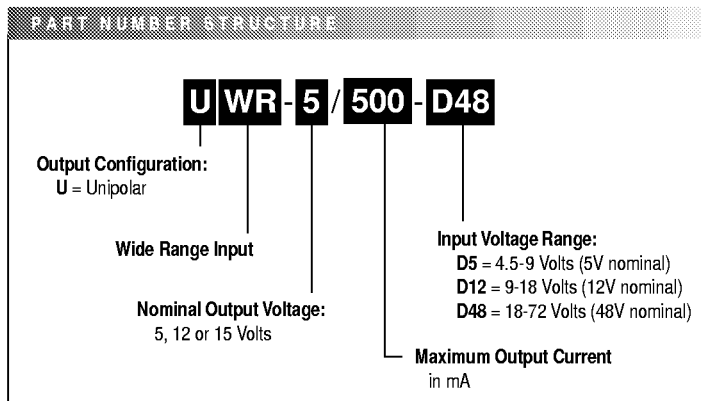

Figure 1. Simplified Schematic

**Performance Specifications and Ordering Guide<sup>①</sup>**

Model	Output						Input			Efficiency		Package (Case, Pinout)
	V <sub>out</sub> (Volts)	I <sub>out</sub> (mA, Max.)	R/N (mVp-p) <sup>②</sup>		Regulation (Max.) <sup>③</sup>		V <sub>in</sub> Nom. (Volts)	Range (Volts)	I <sub>in</sub> <sup>④</sup> (mA)	Min.	Typ.	
			Typ.	Max.	Line	Load						
UWR-5/500-D5	5	500	75	120	±0.2%	±0.5%	5	4.5-9	18/694	70%	72%	C1, P1

- ① Typical at T<sub>A</sub> = +25 °C under nominal line voltage and full-load conditions unless otherwise noted.
- ② Ripple/Noise (R/N) measured over a 20MHz bandwidth.
- ③ 10% to 100% load.
- ④ Nominal line voltage, no-load/full-load conditions.

## Performance/Functional Specifications

Typical @ T<sub>A</sub> = +25 °C under nominal line voltage and full-load conditions, unless noted. ①

Input	
<b>Input Voltage Range:</b>	
"D5" Models	4.5-9 Volts (5V nominal)
"D12" Models	9-18 Volts (12V nominal)
"D48" Models	18-72 Volts (48V nominal)
<b>Input Current</b>	See Ordering Guide
<b>Input Filter Type</b> ②	Pi
<b>Reverse-Polarity Protection</b>	Yes (Instantaneous, 2A maximum)
Output	
<b>V<sub>OUT</sub> Accuracy</b> (50% load)	±1%, maximum
<b>Temperature Coefficient</b>	±0.02% per °C
<b>Ripple/Noise</b> (20MHz BW) ②	See Ordering Guide
<b>Line/Load Regulation</b>	See Ordering Guide
<b>Efficiency</b>	See Ordering Guide
<b>Isolation Voltage</b> ③	1000Vdc, minimum
<b>Current Limiting:</b>	
"D5" Models	Power-limiting technique, auto-recovery
"D12" and "D48" Models	Hiccup technique, auto-recovery
Dynamic Characteristics	
<b>Transient Response</b> (50% load step)	200µsec to ±1% of final value
<b>Switching Frequency:</b>	
"D5" Models	200kHz
"D12" and "D48" Models	170kHz
Environmental	
<b>Operating Temperature</b> ④ (Ambient, no derating)	-25 to +75 °C
<b>Storage Temperature</b>	-40 to +100 °C
Physical	
<b>Dimensions</b>	1.25" x 0.8" x 0.45" (31.8 x 20.3 x 11.4mm)
<b>Case Material</b>	Diallyl phthalate, UL94V-0-rated
<b>Pin Material</b>	Brass, solder coated
<b>Weight</b>	0.5 ounces (14.2 grams)

① These power converters require a minimum 10% loading to maintain specified regulation. Operation under no-load conditions will not damage these devices; however they may not meet all listed specifications.

② Application-specific internal input/output filtering can be recommended and perhaps added internally upon request. Contact DATEL Applications Engineering for details.

③ Devices can be screened or modified for higher guaranteed isolation voltages. Contact DATEL Applications Engineering for details.

④ Devices can be warranted or screened for lower-temperature operation. Contact DATEL Applications Engineering for details. See DATEL's new UST 3W Models for guaranteed operation to -40 °C.

Absolute Maximum Ratings	
<b>Input Voltage:</b>	
"D5" Models	12 Volts
"D12" Models	20 Volts
"D48" Models	80 Volts
<b>Input Reverse-Polarity Protection</b>	Current must be <2A. Brief duration only. Fusing recommended.
<b>Output Overvoltage Protection</b>	None
<b>Output Current</b>	Current limited. Max. current and short-circuit duration are model dependent. "D12" and "D48" models can withstand sustained output short circuits.
<b>Storage Temperature</b>	-40 to +100 °C
<b>Lead Temperature</b> (soldering, 10 sec.)	+300 °C
These are stress ratings. Exposure of devices to any of these conditions may adversely affect long-term reliability. Proper operation under conditions other than those listed in the Performance/Functional Specifications Table is not implied.	

## TECHNICAL NOTES

### Floating Outputs

Since these are isolated DC/DC converters, their outputs are "floating." Users may ground either the Common (pins 5 and 7) for normal usage or the positive side (+Output, pins 6 and 8) to effectively reverse the output polarity.

### Filtering and Noise Reduction

All UWR 3 Watt DC/DC Converters achieve their rated ripple and noise specifications without the use of external input/output capacitors. In critical applications, input/output ripple and noise may be further reduced by installing electrolytic capacitors across the input terminals and/or low-ESR tantalum or electrolytic capacitors across the output terminals. The caps should be located as close to the power converters as possible. Typical values are listed in the tables below. In many applications, using values greater than those listed will yield better results.

#### To Reduce Input Ripple

"D5" Models	47µF, 15V
"D12" Models	10µF, 35V
"D48" Models	4.7µF, 100V

#### To Reduce Output Ripple

5V Output	47µF, 10V, Low ESR
12/15V Outputs	22µF, 20V, Low ESR

In critical, space-sensitive applications, DATEL may be able to tailor the internal input/output filtering of these units to meet your specific requirements. Contact our Applications Engineering Group for additional details.

**Input Fusing**

Certain applications and/or safety agencies may require the installation of fuses at the inputs of power conversion components. For DATEL UWR 3 Watt DC/DC Converters, you should use slow-blow type fuses with values no greater than the following:

V <sub>IN</sub> Range	Fuse Value
"D5"	1.5A
"D12"	1A
"D48"	0.5A

**CUSTOM CAPABILITIES**

DATEL's world-class design, development and manufacturing team stands ready to work with you to deliver the exact power converter you need for your demanding, large volume, OEM applications. And ... we'll do it on time and within budget!

Our experienced applications and design staffs; quick-turn prototype capability; highly automated, SMT assembly facilities; and in-line SPC quality-control techniques combine to give us the unique ability to design and deliver any quantity of power converters to the highest standards of quality and reliability.

We have compiled a large library of DC/DC designs that are currently used in a variety of telecom, medical, computer, railway, aerospace and industrial applications. We may already have the converter you need.

Contact us. Our goal is to provide you the highest-quality, most cost-effective power converters available.

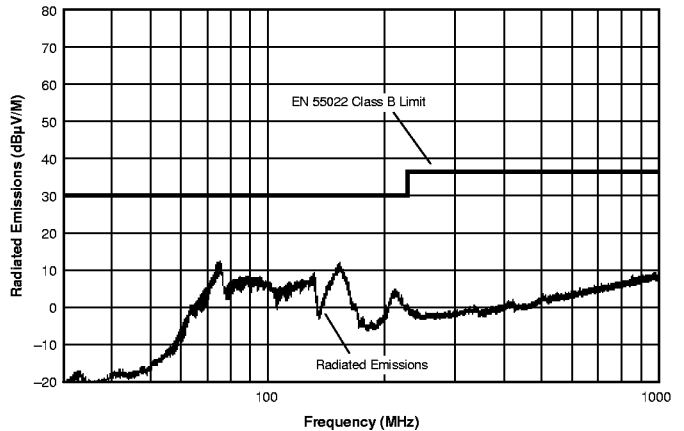

**EM RADIATED EMISSIONS**

If you're designing with EMC in mind, please note that all of DATEL's UWR 3 Watt DC/DC Converters have been characterized for radiated and conducted emissions in our new EMI/EMC laboratory. Testing is conducted in an EMCO 5305 GTEM test cell utilizing EMCO automated EMC test software. Radiated emissions are tested to the limits of FCC Part 15, Class B and CISPR 22 (EN 55022), Class B. Correlation to other specifications can be supplied upon request. Radiated emissions plots to FCC and CISPR 22 for model UWR-12/250-D5 appear below. Published EMC test reports are available for each model number. Contact DATEL's Applications Engineering Department for more details.

**UWR-12/250-D5 Radiated Emissions  
FCC Part 15 Class B, 3 Meters  
Converter Output = 12Vdc @ 201mA**

**UWR-12/250-D5 Radiated Emissions  
EN 55022 Class B, 10 Meters  
Converter Output = 12Vdc @ 201mA**
