

**Ka Band Packaged MPA**

**Key Features**

- Typical Frequency Range: 25 - 35 GHz
- 25 dBm Nominal P1dB
- 18 dB Nominal Gain
- Bias 6 V, 220 mA
- Package Dimensions:  
4.0 x 4.0 x 0.9 mm

**Primary Applications**

- Ka-Band VSAT
- Point-to-Point Radio
- Point-to-Multipoint Communications

**Product Description**

The TriQuint TGA4902-SM is a Ka-Band packaged medium Power Amplifier. The TGA4902-SM operates from 25-35 GHz and is designed using TriQuint's power pHEMT production process.

The TGA4902-SM typically provides 25 dBm of output power at 1 dB gain compression, with small signal gain of 18 dB.

The TGA4902-SM is ideally suited for VSAT ground terminal market, Point-to-Point Radio, Point-to-Multipoint Communications.

Evaluation Boards are available.

Lead-free and RoHS compliant.

- 1/ These ratings represent the maximum operable values for this device.
- 2/ Combinations of supply voltage, supply current, input power, and output power shall not exceed P<sub>D</sub>.
- 3/ Total current for the entire MMIC.
- 4/ When operated at this bias condition with a base plate temperature of 85 °C, the median life is 2.3E4 hours
- 5/ Junction operating temperature will directly affect the device median time to failure (T<sub>m</sub>). For maximum life, it is recommended that junction temperatures be maintained at the lowest possible levels.
- 6/ These ratings apply to each individual FET.

**Recommended Board Layout Assembly**

## Recommended Surface Mount Package Assembly

Proper ESD precautions must be followed while handling packages.

TriQuint recommends using a conductive solder paste for attachment. Follow solder paste and reflow oven vendors' recommendations when developing a solder reflow profile. Typical solder reflow profiles are listed in the table below.

Hand soldering is not recommended. Solder paste can be applied using a stencil printer or dot placement. The volume of solder paste depends on PCB and component layout and should be well controlled to ensure consistent mechanical and electrical performance.

Compatible with high volume surface mount assembly processes using no-clean flux

### Typical Solder Reflow Profiles

Reflow Profile	SnPb	Pb Free
