

Performance Results\*:

Visible Light Transmitted 87%
Total Solar Energy Rejected 19%
UV Light Rejected 98%
Glare Reduction 2%
Visible Light Reflected 11%

Ultra S150

Enhancing safety as only 3M can

## Ultra S150 Benefits:

- Film thickness: 2-mils (0.05 mm)
- Optically clear film
- Microlayered safety film with excellent flexibility and tear resistant properties compared to conventional polyester window films
- Exhibits strong adhesion to glass and shock absorbing properties
- Durable protective hardcoat provides scratch resistance and durability
- Protects from the harmful effects of UV light and reduces furniture fading
- For application to interior surface of glass
- Can be cleaned with typical window cleaning solutions
- Basic glass fragment retention film helps protect from glass hazards caused by seismic activity, spontaneous glass breakage, and low force impact events
- Provides an added measure of security an can help deter Smash and Grab burglaries
- Meets ANSI Z97.1 (Class B) and 16 CFR CPSC 1201 (Category I) impact requirements for Safety Glazing
- Can be combined with 3M Impact Protection Attachment systems for additional safety and security

Interior View

\*Performance data generated for a typical film on 6mm glass using applicable industry test methods and standards.
