

# LINEAR INTEGRATED CIRCUITS

**NTE714** 16-Lead DIP, See Diag. 248  
 Chroma Subcarrier Regenerator,  
 $V_{CC} = 24V$  Max

**NTE715** 14-Lead DIP, See Diag. 247  
 TV Chroma IF Amp,  
 $V_{CC} = 30V$

**NTE721** 14-Lead DIP, See Diag. 247  
 Dual, Low Noise, Low Level Pre-Amp

**NTE722** 14-Lead DIP, See Diag. 247  
 FM Stereo Multiplex Demod

**NTE723** 14-Lead DIP, See Diag. 247  
 FM Sound System,  
 $V_{CC} = 11.2V$  Typ

**NTE724** 8-Lead Metal Can, See Diag. 200  
 Differential/Cascode Amp

**NTE725** 14-Lead DIP, See Diag. 247  
 Dual, Low Noise, Preamp/OP Amp,  
 $V_{CC} = \pm 18V$

**NTE726** 10-Lead Metal Can, See Diag. 206  
 Wide Band Amp,  
 $V_{CC} = 10V$

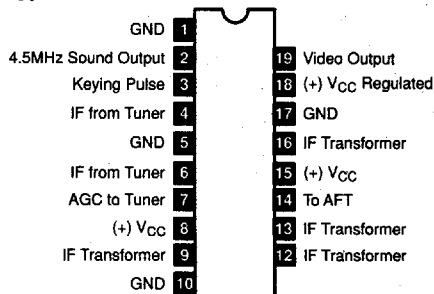

\*NOTE: These leads are internally connected. DO NOT USE.

**NTE727** 16-Lead DIP, See Diag. 248  
 Four Independent AC Amps,  
 $V_{CC} = 16V$

**NTE730** 20-Lead DIP, See Diag. 278  
 TV Video IF System,  
 $V_{CC} = 11.3V$

**NTE731** 16-Lead DIP, See Diag. 248  
 TV Video Signal Processor,  
 $V_{CC} = 30V$

**NTE734** 8-Lead DIP, See Diag. 245  
 TV FM IF Gain Block

See Diagrams, beginning on Page 1-227
