

PV SZ-10M20C

Description

High dissipation surface mount type diode suited for solar cell applications

Application

- Solar cells
- Bypass diode
- For reverse current protection

Features

- High withstand voltage
- Supports high power
- High heat dissipation

Remarks

Package

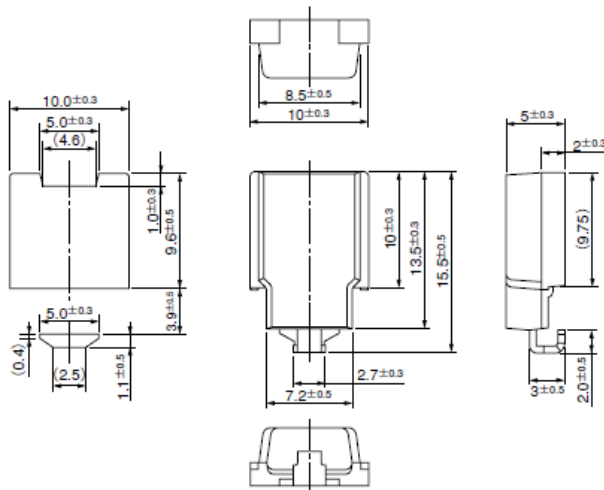

Package Name:SZ-10

Specifications

Forward Current	20A
Surge Forward Current	200A
Peak Reverse Voltage	1000V
Storage Temperature	
Max. Forward Voltage Drop	0.97V
Forward Current (Conditions)	20A
Max. Reverse Leakage Current	0.05 μ A
Reverse Leakage Current Under High Temperature	0.5 μ A
Junction Temperature (Conditions)	
Thermal Resistance	

External Dimensions
